6A TRIACS T610-600B-TR

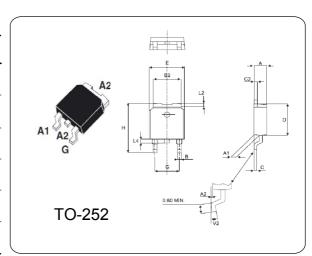

GENERAL DESCRIPTION

Available either in through-hole or surface-mount packages, the T610 - 600B triac series is suitable for general purpose AC switching. They can be used as an ON/OFF function in applications such as static relays, heating regulation, induction motor starting circuits... or for phase control operation in light dimmers, motor speed controllers, ...

The snubberless versions (T6 Series) are specially recommended for use on inductive loads, thanks to their high commutation performances. By using an internal ceramic pad,
